

WORKING ENVIRONMENT

Main goals:

- UNIS will create a working environment that is healthy and educational for all staff and students.
- UNIS should have active management employee participation and involvement to create an excellent working environment.
- UNIS will be the local leader in waste management and recycling.

Knowledge goals:

We will have the necessary knowledge of working conditions to create and maintain a good and healthy working environment. UNIS shall ensure that all receive appropriate training and information on how to create high-quality working surroundings. We will ensure that procedures and training prevent pollution from activities at UNIS.

Approach goals:

We will encourage active participation to improve the working environment at all levels. We will create an understanding and committed approach to how waste is treated and hence how we effect the environment.

Skills goals:

All with tasks connected to the working environment will be offered appropriate courses and training.
