

Svalbard is Science

Svalbard is changing. Science and technology makes up a bigger and bigger part of what is done here. And not just any science; here you work with some of the biggest questions the world is facing today.

Shouldn't the tourists that come the opportunity to learn about these questions, here in this environment?

Svalbard Science Destination, an newly created company, want this to happen, and we need your help. You that have the scientific skills, and is enthusiastic about sharing what you know.

Tour Product Developers

Assemble the stories, find and select the most interesting facts, sites, and presentational elements, and assemble them into a memorable, educational experience. Write the tour playbook. Worry about the budget.

Freelance contracts. Can be combined with guiding (see below) or studies. Some tasks can be done off-island.

Scientific Tour Guides

Our guests will expect to learn something on our tours. They are highly educated, informed and interested in the topics that we will present. If you like to talk about science, this will be an amazing playground for you.

Freelance contracts. Can be combined with product development.

We are building a team that will change the way science and technology is shared with the public. Would you like to work with us?

Come see us at the Lunch Seminar on Wednesday May 4.
